6alsq8000mw manual

Companies cant alter or remove reviews from ProductReview.com.au. sara Greater Melbourne Metropolitan, VIC Is there any filter so i can clean it. Do u just do hot rince to clean the washing machine. Also little rust spots coming up is that any concern Like Share More Similar opinion. Write a review on ProductReview.com.au ! Looking for Top Loading Washing Machines. Read the reviews for Speed Queen AWNA62 148 reviews Ad Antoinette Perth, WA 4 reviews It cleans beautifully. I chose this model because it had manual controls and no push button computer controls which other people have told me can go wrong if the computerized mechanism becomes faulty. The machine is metal and very sturdy with an agitator which I find cleans clothes much better than a front loader. Although expensive I think that is is totally worth the money. Absolutely fabulous, reliable and relatively quiet. Date Purchased Aug 2008 Like Share More Similar opinion.The water consumption is higher than I would like but the cleaning efficiency and reliability outweigh these considerations. It is noisy compared to the direct drive machines but I find myself having a little groove in the laundry to the beat so to speak. The gentle cycle is very gentle on my woollens and the extra rinse is good for getting the extra detergent from my extra dirty work clothes. Reliability was my motivator with this machine as we had an old second hand whirlpool for years before passing it on. Im a big fan of the simplicity factor as well. - 1.0.

Not so good features It has no system for removal of lint and this drove me crazy initially until I read the instructions, followed them, and worked out how to get rid of the lint. Simply sort the wash by colours, 3 basic groups will get rid of the lint black, white and colours. It does use a lot of water compared to a front loader but I like my washing properly rinsed. 1 like Share More Similar opinion. Write a review on ProductReview.com.au ! Jack I am sorry I ever bought a whirlpool every load of washing is covered with lint. I even tried liquid washing powder. I am very disappointed and I double rinse. I will never entertain a whirlpool machine again and this is industrial one and I have noticed rust on the drum not happy. Gabrielle Like Share More Similar opinion. Susie167 Mandurah 3 reviews 1 like Purchaed another one because it did the larger loads and was efficient timewise. However, this new machine purchased in feb 2011 was a bit noiser than the first machine and has progressively been getting worse. Trying to contact whirlpool has been a delimma in that you call an asian call centre. I would dearly like to speak to a manager to discuss implied warranty on the noisy gearbox which my washing machine man tells me is the problem. Please give me a phone number to talk to someone in Australia. Takes large loads and time efficient Noisy Like Share More Similar opinion. Write a review on ProductReview.com.au ! Jennyp38 Maryborough 2 reviews 2 likes Every time i wash all the clothes come out either covered in lint or you can see fabric softener on them or even better BOTH!!! My husband is a whitegoods repairer and is forever repairing the electronic boards on washing machines. So he talked me into buying this manual one. DONT DONT DONT buy one they are junk!!! Bought it because it didnt have electronic panel was a manual machine Doesnt clean anything properly, forever delinting your clothes.big time waster 2 likes Share More 1 comment K LUMBY 8 years ago Had my top loader for 6 years best washer i have ever had Like Report Similar opinion. Read the reviews for Speed Queen AWNA62 148 reviews Ad Maria00 ADELAIDE I really put this machine to work and it seems to be built to take it.I confidently say it is an excellent machine made to last. It only has pros! Like Share More 1 comment washmum 8 years ago Machine seems to leave lint on clothing every time it is used. Another problem I cannot see where the button is to start the wash. Never know which wash to put it on to prevent the lint even on extra large we still have the same problem. Like Report Similar opinion. One of the factors in the choice of this so I was told was that it doesnt have an electronic panel, unlike most other machines on the market.

<http://ninethreefox.com/?q=node/12963>

Read more ired and can last for years, and theres a huge secondhand market demand for them. The other factor in the decision was the size. I have a family of 5, and I have to wash every day to keep up with the laundry piles. My husband is a brickie, and all 3 kids are boys, who are always grotty and grimy. This machine can take huge loads. I can put large amounts of bedding through, or the entire familys towels in a single load. Unlike so many other reviewers on this panel, I have absolutely no complaints with the wash results. The clothes are cleaned well, and although the wash action does seem quite robust, it hasnt destroyed anything. I do use a wash bag for all very delicate items, though. The fact that it has an electronic temperature control is brilliant, as here in Canberra the cold water can be absolutely freezing in winter, but this machine adds just enough hot water to make the water the optimal temperature to achieve an effective cold wash. I really dont know how others have had such problems with lint. I spent the first few washes searching for the lint filter to empty it, because I assumed it had one, as there was no lint left on my clothes. You can imagine how surprised I was to discover that there wasnt one. To me, thats a timesaving bonus. And no, after around 2 years there still isnt any lint on my clothes. If Im going to nitpick, I suppose it doesnt spin as well as my old machine the washing can still be a little damp at the end. And it is a long reach down to the bottom to get out all the small items, so if you have major back problems I wouldnt recommend it. Another VERY minor complaint is that it doesnt beep or anything when the load is finished, which is mildly irritating after having that feature on my old washer. All in all, I really have no complaints. Just dont drop the lid on your fingers, as it is really heavy! A little noisy, slightly inadequate spin cycle, very deep bowl. I paid a small fortune for a machine with a large chip that may damage my clothes, yet Whirlpool demonstrates absolutely no sense of urgency and takes no responsibility for my situation. Do not even think of buying from this company. I had one of these delivered today and they took away my old Kleenmaid. After the delivery guys left, I discovered a deep chip in the enamel bowl, about 3mm x 2mm and right down to th. They refuse to let me talk to a supervisor. I am furious and very unhappy. Like Share More Similar opinion. Compare all Scott1984 Melbourne Countless phone calls, continual side stepping. Hoses to machine were incorrect on installation and leaked like a garden hose. Due to its American origins, thread adapters are required to the inlets which does not allow you to place the machine within 30cm of the wall at the rear. After finally getting the machine working I discovered it actually doesnt wash the clothes. It makes a lot of noise and the clothes come out covered in lint a. Read more nd often not clean. This machine should be taken off the market immediately. Do not buy this machine. Solid looking construction. Clothes go in dirty, come out dirty and covered in lint. Made for the American market not Australia. 1 like Share More Similar opinion. Write a review on ProductReview.com.au ! Sandra29 AU Although the machine washers alright the clothes come out covered in lint. Too much lint on the clothes. 1 like Share More Similar opinion. Ended up selling it for next to nothing just to get it out of my sight. Very dissapointed with it, expected more from a Whirlpool product. Like Share More Similar opinion. Read the reviews for Speed Queen AWNA62 148 reviews Ad Lars.J WA, 6112 10 reviews 10 likes The knob came off the first time I used it and it was missing screws so it rattled when it was used, so I returned it only to be given a replacement which after 10 days I noticed that the bowl had already had started to rust in at least 6 different places.

<https://connylahnstein.com/images/canon-550d-manual-sensor-cleaning.pdf>

I had previously owned a Whirlpool washer and I was happy with that and it took 10 years for rust to start appearing in the bowl obviously the quality has become substandard over the 10 years. I would not recommend this machine to anyone, please don't buy. Read more by one and save yourself the drama which WILL be associated with buying these washing machines. I can only describe this as the biggest piece of junk I have ever bought. Nothing at all. Pieces fall off it and the bowl rusted after 10 days. Like Share More Similar opinion. Write a review on ProductReview.com.au! JennyD 12 reviews 4 likes I had the previous model, which did have a far more gentle cycle, for woollens etc, but that's not my main wash anyway. Read more check for tissues beforehand. It also can deal with a few items without unbalancing something my front loader couldn't cope with where I'd end up hand wringing things in frustration. Whilst it hasn't got many programs to choose from 3 main ones, these are plenty, if all you need are standard programs. Easy to use. Can shorten programs or start anywhere through a program. Quick cycles. Robust exterior. Like Share More Similar opinion. I have done this on previous machines no trouble but I can't work this heap of junk out. Like Report Ray asked 6 months ago Can you still buy the replacement inbuilt lint filter for this Whirlpool washer. I've tried everything even did a Drum clean Service wash today and still had lint on clothes ready to buy a new one this has been my only problem. Like Share More 1 answer Schae P. Whirlpool 6 months ago Hi Ray, please contact our Spare Parts Department on 1300 762 219 for the availability of the lint filter replacement. Kind regards, Whirlpool Like Report Jacqui Dunn asked 8 months ago I am having problems with lint on my washing. I have tried numerous things to fix it I can not find the lint filter on the machine model is 6alsq8000mw4 top loader Can you give me directions on where to find it.

Thank you Jacqui 1 like Share More 1 answer Anthony F. Whirlpool 8 months ago Hi Jacqui, This Whirlpool model has a filter plate at the bottom of the tub that catches any lint or solid matter, but it is not a mesh type filter. Rinse water flows over the filter, separating the lint from the water. The lint spins out of the system during the spin cycle. The filter is supposed to be self-cleaning so if it is leaving lint behind then maybe try running a rinse cycle without clothes to flush out remaining lint. I throw lots in and push one button. It couldn't be easier. Read full review Stressfree Washing Days. Happy with everything about it, it's easy to use, sturdy, quick cycles, and the clothes come out clean!! Excellent. Read full review Excellent no fuss washer. by Irene B. on Jul 7, 2020 Love this washing machine, easy to use and takes hardly no time to finish the wash cycle. Clothes come out clean. The only downside would be the price. Whether you love or loath being in the kitchen, our

Like Share More 1 answer Antoinette 1 year ago You can remove the very top round thingy OR best solution of all is to put vinegar and baking soda into the machine and run a cycle. Alternatively you can empty a dishwasher cleaner and run through a hot cycle. I've had my machine for 11 years and it is still going strong. Read the reviews for Speed Queen Awna62 148 reviews Ad Ace asked 2 years ago Where is the filter Like Share More 1 answer Antoinette 2 years ago You remove the top section of the agitator and clean it. I also clean the machine by using bicarb soda and vinegar. I have had this machine now for nearly 11 years and still goes like a dream Like Report Ken asked 2 years ago My clothes are still dripping wet after the wash cycle is finished it drains all the water but it seems like the drum is not spinning fast enough. Any ideas Like Share More No answers Kay asked 2 years ago My machine making a loud noise and just turning one way is it the gear box. Any ideas Like Share More 1 answer Sue 2 years ago Google it that's what I do usually find some helpful and cheap answers. Good luck Like Report Rob asked 4 years ago How do I only use cold water in this machine. Like Share More 2 answers mumsbeenshoppingagain 4 years ago Hi. From memory I don't think you can. This is one of the issues that I had with the machine, as I always just wash in cold water and it annoyed me that I had to use both hot and cold with this machine. Like Report RobbyT 4 years ago Turn the hot water off at the tap.

BANGKOKCABLE.COM/ckf_bccUpload/files/canon-battery-charger-cb-5l-manual.pdf

Only leave the cold tap on and choose a cold wash cold rinse. Like Report Joy asked 4 years ago I would also like to know if this machine has a lint filter, as I have no manual for this machine, any help would be appreciated. It washes great and was second hand but I am finding little bits of dirt on my clothes. Like Share More 3 answers Susie167 4 years ago No doesn't have a lint filter. You may need to remove the centre agitator to clean that every now and then. Like Report Sara 11 months ago How do you remove the bolt when it's very long to get in there I don't have tools take it off. Like Report Steven R. 4 months ago Socket wrench Like Report Justin asked 4 years ago Water usage on medium Like Share More 2 answers Susie167 4 years ago I do not know the actual litres used if that is your question. Like Report RobbyT 4 years ago Wouldn't have a clue. It likes to use plenty of water. Read the reviews for Speed Queen Awna62 148 reviews Ad Evelina asked 4 years ago Hi, I have this washing machine and it is very good but what I want to know how and where is the filter for me to clean. Thanks! Like Share More 1 answer RobbyT 4 years ago I presume you are talking about a lint filter and that's the problem with the machine, there is no lint filter, at least not one that I've ever

been able to find. The only way to deal with the problem is to sort the washing by colour and follow the instructions on the underside of the lid. I sort my washing in three colours, whites, blacks and colours, if you want to take it even further, go searching for the lint in the dirty washing before its put in the machine i.e., turn out pockets and tight corners and brush with a nail brush. You'll be surprised at how much lint you get out. In spite of this problem I don't know what I would replace the machine with if it brakes down, front loaders don't appeal to me they might be water efficient but I don't think they are energy efficient when it takes up to 2hrs for a simple cycle.

Good luck with the filter. Like Report Willywahpoo asked 5 years ago Is there a lint catcher. Like Share More 1 answer Susie167 5 years ago HI. No as far as I know there is no lint catcher in my machine Like Report tools.equipment asked 5 years ago Rusted drum after 3 years.Melbourne Vic. Like Share More 1 answer Susie167 5 years ago That is bad that you have a rusted drum.I had my original Whirlpool for many years with no rust and we lived on the ocean. Like Share More 2 answers Susie167 6 years ago I can only suggest that to avoid getting fluff on dark clothing you regularly wipe out the machine barrel with a damp cloth, particularly if you are washing dark colours after washing towels, sheets, anything that leaves a residue. It is another job that we must do, but in the long run saves time using the lint roller to remove fluff.Like Report Joy74 asked 8 years ago Does the Whirlpool 6ALSQ8000 have a lint filter, and if so where. My old Simpson had a lint filter in the middle of the central agitator, which could be removed, but this one does not seem to be removable. No this washing machine doesn't have one. I expected to find one there as well, but to my surprise, this machine has none. You will find lots of info and tips. The main causes for excess lint in washing are putting the wrong fabrics together in the wash some shed lint badly and others attract lint; cramming too many garments into the machine so rinsing is inefficient; not wiping out the machine after use. You may not need any detergent or soap, your towels will remain fluffy, and your machine will remain fresh and free of buildup. Bicarb as a soaker is good for removing stains, mould, and as a whitener. Do not use fabric softener. It causes a build up of silicone on your fabrics which makes them less absorbent.

Dont forget to rate my solution as solved if i answered your question accurately.Thanks!! The cap will pull off towards you as you are facing the unit from the front of the washer. There will be a screw under each end cap that you will need to remove. b. If the console does not have removable end caps, you will need to slide a putty knife under the front corner of each side and push in while lifting up.

There is a retaining clip under each side that has to be released. 3. Once the console has been released it will lift up and fold back over the back of the washer in its resting position. Use care not to stress the small plastic hinges that hold it on. They can break easily. 4. Under the console will be two large brass colored clips. Take a large flat blade screwdriver and place it in the groove of the clip on the washer top. With the screwdriver firmly in the groove, push away from you towards the back of the washer. This will release the clips. 5. Disconnect the lid switch connector plug. This is the white colored plug on the washer top under the console. 6. Remove the washer casing. Open the lid of the washer. Using one hand, grip under the front rim of the washer opening. Do not grab the wash tub, just the casing. Tilt the washer case from the back first towards you, slide forward slightly, and then lift up. The entire case comes off exposing the wash tub and components. Once the casing is removed, you should have full access the the washer interior components. Next, follow these series of steps 1. Remove the tub ring. This is the cylindrical donut shaped ring attached to the top of the wash tub. This ring needs to be removed in order to accommodate the removal of the inner spin basket. The tub ring comes off by placing a screwdriver under the series of the tabs that hold it in place and GENTLY prying them up until they release. Be careful not to break off the tabs, or crack the wash tub. 2. Remove the spanner nut that is under the agitator. This holds the inner spin basket to center post. 3. With the spanner nut removed, the spin basket should lift straight up and out. This can be accomplished by grabbing the rim of the spin basket and prying up on one side, then the other, in an attempt to rock the basket side to side. Searspartsdirect.com has excellent exploded view diagrams that you can use as a reference.

The tub ring gasket, I mention below, is listed as item 6. Appliancepartspros.com also has these same drawings. Some things to consider If you remove the tub ring, it is recommended that you replace the seal on the ring before reassembly. Once the tub seal is broken, it can leak if the seal is not replaced. When reinstalling the exterior cabinet, follow these steps 1. Reinstall washer case. With the lid of the washer open, place grasp case under front rim and place it on the washer frame. While looking down through the washer lid opening, make sure the front lip of the case is placed UNDER the washer frame and rocked back onto the frame to ensure that the small cleats on the frame fit into the slotted grooves on the washer case base. If you do not get the case seated correctly it will rattle and vibrate while the washer is in operation. 2. Make the back of the washer fits into the

washer casing on each side and reinsert the brass clips. Place the clip into the slot on the back of the washer first, and then forcefully push it into the opening on top of the washer. It will snap back into place. 3. REINSTALL LID SWITCH CONNECTOR. It is easy to forget. If you do not reconnect it, the washer will not work correctly. 4. Reinstall console. If you have questions, or need further assistance, please let me know. I hope this helps you. PS What is the reason for removing the spin basket. Anything else I can help you with

Procedure 1. Check the drain hose and make sure it is not plugged or kinked. 2. Unplug washer or disconnect power. 3. Check the electrical connections at the pump and make sure the pump is running. 4. Check the drain pump filter for foreign objects. 5. Plug in washer or reconnect power. 5. If the above does not correct the problem, go to step 7. 6. Unplug washer or disconnect power. 7. Replace the pump. Alternative Procedure If the machine cannot be forced to its diagnostic mode then 1. Disconnect the washer from the power supply and water supply. 2.
